

### Features

HM-868 is possible to change filling material rapidly and easily because of the easy disassembly cylinder. The dough belt will go through 3-4 rolling stages to produce the proper thickness without damaging the gluten of dough.

Following this process, the Auto Filling Feeder will extrude the filling on the dough belt. The dough belt with filling on top is rolled by the cylindrical molding section and the dough belt forms the outer casing. The Auto Filling Feeder is an independent unit and easily to be attached and removed for cleaning and convenience of changing different filling material.

Finally the encruster automatically forms the rolled dough with inner filling into the profile of choice Such as ball, long bar or pillow shape. The ratio of filling and casing is fully adjustable as well as the size and length of product.

### Typical Products

HM-868 is suitable to make laminated dough products, Knish, Dinner Roll, Cinnamon Roll, Meat Sandwich, Hot Dog Bread, Meat Pie, Toast (Pan Bread), French Bread, Filling-inserted Bun, Meat Bun, Vegetables Bun, Red Bean Bun, Steamed Bun, Rabbit Bun etc.

### Specifications

Model	HM-868
<b>Product Weight</b>	10 - 600g
<b>Capacity</b>	600 - 12,000 pcs/hr
<b>Machine Dimension</b>	900kg
a. Standard	a. (L)4200 x (W)1300 x (H)1750 mm.
b. Optional	b. (L)5230 x (W)1300 x (H)1750 mm.
<b>Electricity</b>	3 Phase, 220V, 3.75KW
